

MISCELLANY.

MARTIN VAN BUREN.

In these times of party excitement and party vituperation, it is as rare as it is agreeable to witness instances in which the Whig opposition or any of its members, render voluntary justice to the Democracy, or those supported by the Democracy. When such instances meet our eye, it affords us pleasure to record them as highly complimentary to the justice and liberality of their authors. The following extract is from the *New York Sunday Morning News*—he is describing the "Magician," and although he paints with an unfriendly hand, we are willing to take the picture as substantially correct, and let the enemies of Mr. Van Buren make the most of the admission: "If you attempt to throw him off his guard and bring him into collision, you will fail. He is always watchful, circumspect and ready. He meets every thing with an imperturbable smile; anger is not in him; or rather it may be said that policy has overcome it. His passions and feelings are subdued by the predominance of the master passion of ambition. There he sits in the chair of the senate and listens to the most direct and offensive personal insults from men, who are responsible, at ten paces, for what they say, and no more is he affected by the attack than by the snuff which ever and anon he gives his nose. Mr. Van Buren was never known, during all the party conflicts through which he has passed, both in the state legislature of New York and in congress to betray the slightest excitement of feeling upon any occasion. This is a remarkable fact, and sufficiently extraordinary and characteristic to be inscribed on the tomb of the individual, if ever he should die; but I don't believe, myself, that he is subject to any of the ordinary diseases which afflict humanity. He appears to me to be destined for a miniature immortality on this earth. Fortunate man! he is insensible to one half of the ills which flesh is heir to, and appears able to encounter and triumph over the other half.

"A thousand times have I been asked, what sort of a speaker is Mr. Van Buren? I have had a pretty good opportunity to know; for, during the whole time that he was in the senate, I was a constant attendant upon his debates. When called upon for a sudden explanation or reply, he was never flustered in the least degree, but would evolve an answer on an argument in such a way as to confuse and confound his adversary. I may truly say that I never knew him to make an effort; though what he did, might seem to those unacquainted with his exuberant and glowing mind to be the result of an effort. His words always seemed to me to flow freely and untrammelled from the perpetual well spring of native mind; and yet they were always so checked and guarded by an apparent innate sense of propriety, as never to overreach their mark, while, at the same time, they never fell short of it. On some objects he would display his powers, without reserve, as a mere speaker. The most remarkable case of this sort was his speech on the bill granting pensions to the remnant of the revolutionary soldiers. This, I believe, was in the year 1829. I was in the senate chamber at the time, and was so enchanted and fascinated by the eloquence of the "magician," as they now call him, that nothing would induce me to leave the chamber till I had drunk into my eager ear every word that he uttered, in a speech of four hours. Every one seemed to feel himself in the grasp of a mighty intellect, and felt awed, subdued and chastened, by the splendour and power of that unequalled oration.

**Heirs wanted for thirty-two millions.**—The heirs of Hugh, John and Daniel Mosher, to whom an estate to the above amount has lately descended in England are missing. The Albany Daily Advertiser says, a search for them is making in this country.

The Richmond Compiler says, that the President and Directors of the Richmond, Fredericksburg and Potomac railroad company, are making arrangements which will enable travellers leaving New York in the morning, to be in Richmond the next day to dinner; and on the other hand, will enable them to leave Richmond after breakfast and be in New York the next evening.

The Legislature of Virginia has voted unanimously, awards to the son of the late Lieutenant Colonel Geo. Armistead of the United States Army, the gallant defender of Fort Mifflin, and to Capt. A. P. Venable, of the U. S. Navy, for his good conduct in the Battle of Lake Champlain.

BANK ARRANGEMENTS.

Mr. Jordon, Cashier of the U. States Bank, has gone to England for the purpose of carrying into effect an arrangement already made, by which the Bank has disposed of the notes which it took of the various institutions and individuals who purchased the Branches. By this operation, the Bank will realize over \$200,000,000 immediately, besides making a liberal profit on the difference between the rates of interest received and paid.

To this we may add, that an association is proposed by a large number of wealthy and highly respectable gentlemen, to be formed on a basis of not less than forty millions of bonds and mortgages, secured upon property of the value of eighty millions, which association proposes to become the fiscal agent of the government for money in its hands by the transfer of an equal sum in mortgages, besides the allowances of interest. Such an association would be of the highest advantage to the government and the finances of the country, and we are happy to be able to say that it has been most favorably received by gentlemen high in office, of both political parties.

AN IMPORTANT ARREST.

For several months past, the Treasury Department has been in possession of information calculated to lead to the detection of the persons engaged in causing the destruction by fire, of the Treasury office at Washington, about three years past. On Wednesday last a man was arrested in the city of New York, charged with firing the building with his own hands, hired to commit the act, as we have heard, by some of those who had committed frauds upon the Pension office which they wished to have destroyed to screen their guilt. Other persons we hear, before this, will have been arrested in the Western part of New York, one in Vermont and another in Ohio. The person that was taken in New York was brought on yesterday in the steamboat line, in charge of Mr. Blaney, the high Constable of Philadelphia, Mr. Kelley, Deputy Marshall of Ohio, and Mr. Merritt, of the New York police. These officers left Baltimore this morning with their prisoners, for Washington, where the trial is soon to take place. *Baltimore Patriot.*

**Not Bad.**—A master tailor tells us that, in one year he paid one journeyman \$4,498 for work. Yet better—another master says, that in forty five weeks he paid one journeyman \$1,645. We had better all turn tailors. *N. Y. Star.*

The delinquent legislators of Louisiana, who fail to attend to their duties by absence, are, by order of that body, daily advertised, like runaway slaves, in the state journal, the "Bee," until they return to their seats.

**A Quiet People.** The Newington folks, Connecticut, hearing that it was proposed to run a railroad from Hartford to New Haven, through their town, presented a remonstrance to the Directors, representing that they were a peaceable, orderly people, (which in truth they are,) and begged that their quiet might not be interrupted by steam cars and an influx of strangers.

**University of Nashville.**—There are, we are happy to learn, one hundred and eleven students connected with the four regular classes of this flourishing and deservedly popular institution. *Banner.*

**Economy.**—"Oh, eat it up, dear—eat it up," says mamma. "I can't eat it. I've eaten enough." "Oh yes, dear, eat up what's on your plate so that it need not be lost!" How common a practice this is; stuffing children beyond the wants of nature, and making them glutted, all their lives, so that the scraps need not be lost! Precious economy this!

**To make Perpetual Yeast.**—Take one pound fine flour, make it the thickness of gruel with boiling water; add to it half a pound of loaf sugar, mix them well together, put three spoonfuls of well purified yeast into a large vessel, upon which put the above ingredients, and they will soon ferment violently. Collect the yeast off the top, and put it into a small neck pot, cover it up from the air, and place it in a dry and warmish place; when used in part replace with flour made into a thin paste, and sugar in the former proportion. I saw this used after it had been five months made. No yeast is necessary except the first time.

**The Burnt District.**—Upwards of two hundred buildings are now rising from the ashes of the conflagration, and every day adds some ten or a dozen to the list. Many of them have their cellar walls up; some the first story walls and granite fronts; some the timbers of the second floor, &c. The district resembles for activity the surface of an ant hill on a summer's day. As soon as industry can accomplish it, all the destroyed stores will be replaced, and with edifices far more beautiful and convenient than the old ones. The streets will be much better, and on the whole, we have no doubt that business will be much more firmly fastened to this section of the city, than it would have been if the fire had never occurred. *N. Y. Jour. of Commerce.*

RECIPES.

TO TAKE OUT IRON MOULDS.

Hold the iron mould over the fumes of boiling water for some time, then pour on the spot a little juice of sorrel and a little salt, and when the cloth has thoroughly imbibed the juice, wash it in ley.

PASTE FOR CRAPED HANDS.

Wash a quarter of a pound of unsalted lard—first in common, then in rose water, mix with yolk of two new-laid eggs, and a large spoonful of honey. Add as much fine oatmeal, or almond paste, as will work it into paste.

TO REMOVE SPOTS OF INK FROM LINEN.

Take a round candle or some pure tallow, melt it and dip the spot of ink in the melted tallow, then put it into the wash, when it will become perfectly white. This given from experience.

Substantial applause.

We learn from the Mobile Advertiser, that the play-going folks of that cottonemporium are in raptures with the performance of a very young actress in the theatre there by the name of Miss Meadows; and almost every time she appears, showers of dollars and half dollars are thrown on the stage around her by the audience, by way of applause. We think this a decided improvement upon the fashion of applauding by the stamping of feet and clapping of hands; and we doubt not but the little enchantress Meadows thinks so too.

It is an illustrious fact connected with the life of Andrew Jackson, that he has never been defeated, as the agent of his country, by any of its enemies, either foreign, savage or domestic. A superintending Providence has always guarded him, presided over his destiny and protected his character. We are not superstitious, but we believe there is a dispensing power in the Divinity which no human agency can control. The life of the distinguished patriot, of whom we speak, seems to have been under a guardianship, unlimited in power, and intimately connected with the destiny of freemen. *Ohio Aurora.*

Artificial Nipple Shield.

FOR the prevention and cure of Sore Nipples. The following highly respectable certificates are deemed a sufficient recommendation for those who are afflicted in this manner, to try them.

From Doctor Wm. P. Dewees, late Professor of Obstetrics, in the Medical University of Philadelphia. Dear Sir, As I feel it a matter of such public importance, to possess a means of lessening the terrible sufferings from sore Nipples, I have much pleasure in being able to say, that the "Shield" you offer for the preventing and the cure of this malady, is better adapted to the purpose than any I have heretofore seen. In the two or three instances I have known them to be used, much satisfaction to be derived; and I have no hesitation to believe it will generally succeed. I am so well persuaded of this, at this moment, that I cannot forbear to express a wish that our city, through the various Apothecaries may be supplied with them. I am yours, &c. M. P. DEWEES, M. D. Philadelphia, Jan 13, 1834.

From Dr. Thomas Seawall, Professor of Anatomy and Physiology, Columbia College, District of Columbia. Having examined Dr. Pratt's newly invented Nipple Shields, and witnessed its practical application, among my patients I take great pleasure in recommending it as decidedly superior to anything previously known. It constitutes a perfect remedy for that distressing malady, Sore Nipples; a disease which so frequently afflicts young women.

THOMAS SEAWALL, M. D. From Thomas P. Beers, M. D. Professor of Obstetrics, in the Medical University of New Haven, Connecticut: Having witnessed the application of the artificial nipple, invented by Dr. Pratt, in several cases of excoriated Nipples, in which the children attached themselves to it as readily as they would to the natural ones, and received their fill with perfect ease to the mothers, I have no hesitation in recommending it as decidedly superior to any thing of the kind with which I am acquainted.

THOS P. BEERS, M. D. The above instrument is for sale, at the moderate price of 25 cents each, by WILLIAMS, HAYWOOD & CO. Raleigh, Feb. 1836.
